	BYT-184				2	9

In contrast to the previous sprint, this sprint’s burndown chart presents a steeper drop near the end of the sprint. The steep drop indicates that tickets were completed nearing the end of the sprint. We were unable to appropriately track our real time progress of the tickets, and some stories were not split into subtasks but rather were handled as a big group of tasks as one ticket. Moreover, there were some interlaced tickets which hindered our progress on completing the tickets and ultimately impacted the velocity of the sprint.
